

DID YOU KNOW?

Colorectal cancer rates in Louisiana's Acadiana region are among the highest in the country.

Screening can help prevent colorectal cancer or catch it early when it is easiest to treat.

You should talk to your doctor about getting screened for colorectal cancer if:

You are 45 years of age or older

⋮
or

You have a family history of colorectal cancer

Don't wait! If you meet either of these guidelines talk to your provider about screening options.
